500,000 Approved For Onitsha Market

The Eastern Regional Production Development Board has agreed to finance the construction of the new Onitsha Market on the banks of the River Niger. The new market will cover an area of [illegible] acres; the estimated cost of construction will be £500,000 while the result will be one of the most modern markets in Nigeria.

It will consist in all of 3000 concrete stalls, and there will be two main groups of buildings and long high running down to the river. The covered market will be spanned by 50 steel trusses, while the roof itself will be of cement and asbestos. The market will have its own pumping plant, guaranteeing for itself an adequate water supply. The sanitary arrangements will be of the most modern and the market layout promises to be the most impressive in the country.

Special buildings will be constructed for the sale of meat and fish and also for the storage and sale of goods. The new market will have two slaughter houses, one large one where [illegible] cattle a day will be slaughtered, and a small one for sheep, pigs and goats.

It is believed that the construction of the market will take 18 months to two years. When it is completed it will be an outstanding tribute to the work of Eastern Regional Production Development Board and [illegible] the Nigeria Oil Palm Produce Marketing Board which finances the Regional Production Development Board.
