Complaints About Nigerian Cocoa

Reported in the press have recently drawn attention to irregularities in the cocoa trade which, during the past season, have done damage to the reputation of Nigerian cocoa in overseas markets.

A number of shipping controllers, who had been engaged to examine cocoa exports, buyers and the resulting investigations revealed serious irregularities in the handling of cocoa. The Nigerian Cocoa Marketing Board, which was originally responsible for maintaining quality and quantity standards, should do more to ensure that the margins between the cost of production and the selling price of the product are not too great.

The results of the investigation have led to the formation of a committee to look into the matter. This committee has been given the task of investigating and eliminating the irregularities which have occurred in the handling of the export of the product to the Nigerian market.

A number of specific cases involving irregularities in the handling of cocoa are being investigated by the Board, and it is hoped that the findings will be made available to the public as soon as possible.
