CAN THE WORLD WAR BE AVERTED?

By A. J. O. O. O.

The hope towards the close of last year that 1938 would be a year of appeasement in Europe and in the world over has so far shown no signs of fulfilment.

It is the belief of some people in some quarters that the European crisis which had created considerable fear and anxiety of late has reached or is reaching a standard of general understanding.

So far as I know the atmosphere of European International Crisis remains calm, peace and tranquility prevail.

But be it as it may it must be clearly understood that Germany is still pursuing a strong policy that her lost colonies in West Africa be returned to her. She believes that the returning to her of her lost colonies will further increase her power and prestige. Unless and until she has reason to revise that opinion the world war will be inevitable, but if the British and French Powers are prepared to peacefully return the lost colonies to Germany the great danger of world war may be easily averted.

Still it is the universal belief that if the demand of Germany is peacefully granted, no doubt Herr Hitler will not for anything depart from his original intention of seeking for more extension of territories, because his chief aim was to concentrate on efforts to slaughter and man those who would oppose his ambitious plans in order to achieve his goal.

The following is a concrete and comprehensive account of Herr Hitler's intention to resort to war rightly or wrongly.

In order that Germany might be able to prepare her plans successfully or to re-arm herself on land, sea and air in the best way possible, she resigned her membership from the League of Nations some years ago.

It is a universal knowledge that Germany, since her resignation from the League of Nations had devised ways and means by which she has found sufficient money to re-arm herself on land, sea and air; therefore her aims and plans

then in view have now been materially accomplished. Therefore, can the war weapons which Germany now possessed be destined to perish, like an exhibition pavilion after the exhibition is over? Emphatically I say no, unless and until Herr Adolf Hitler, Germany's Dictator has reason to revise his opinion, then the world war can be averted.

Ibadan,
19th October, 1938.

Dear Editor,

I shall be very much obliged if you can allow me a little space in your widely read journal to direct the attention of the authority concerned to an urgent need in the Ibadan-Ilesha-Ife road.

If I am correct, I believe that the policy of the Native Administration is that every tax payer at least should be entitled to enjoy the full advantage of the taxes he pays; but I am sorry to say that in some parts in these districts, the people are deprived of this advantage.

To particularise my statements, there is a village lying about nine miles away North East of Ilesha named Iye which suffers the kind of deprivation of some privileges. Since the time of the "Eyo" on 1st of this village, who died in 1914, the people of the village in question had been applying to the Ilesha N. A. for the construction of a motor road from Ilesha Junction to Iye, a distance of about three miles, expressing the difficulties encountered whenever transferring the products of the Ilesha farms to market, but nothing was done, at least when the people promised to construct the road themselves, except the bridges, they were allowed to make a start. It is now almost a year ago since the road had been completed without good bridges across the chief river, (Omi) and the two smaller streams (Kofe and Apofa). Practically the road is useless without motorable bridges across the rivers, and if this road is meant to be of the proposed use to the people, an urgent construction of the bridges is of vital importance.

On behalf of the inhabitants of this village, I strongly appeal for the help of the authority concerned to see to the construction of these bridges in order to satisfy the immediate need of the suffering inhabitants.

Thank you Mr. Editor, for space allowed.

Yours etc.

A. B. O. O. O.

ABEKUTA BIG NIGHT AT

The Ake Centenary Fair.

Ake's Molechit Epopee
100% Real Diopic.

On the evening of Monday 20th 1938, the Ake Centenary Hall was a sea of lights in the midst of a Glorious Night which was displayed in connection with the commencement of a new era in the history which had passed on the 27th of Sept. 1938. In the Ake Centenary Hall, the Highness was seen sitting on many thrones in England which a decorated army of Honour and Honour. The former British, A. H. Murray Esq., was his pilot boat, in a sailing by car and a boat, lying in the acceptance, including on thrones and even sailing from one part of London to the other.

Chief Lando, Akedip etc. served as his attendants together with Princess Akedip and was also seen kneeling closely along with the Akedips.

The whole spectacle in the Centenary Hall resembled the Highness, who was seen to be smiling and gorgeous attire, respectfully advanced forward and shook hands with the King-Successor of the British Colonies beyond the Seas—His Majesty King George VI. God Save The King of the Whites and of the Blacks.

After a lengthy and very successful thrilling entertainment, the great road in the Ake Centenary Hall, including Akedip and His Akedips, is being visited by many happy visitors of the anniversary.

TO OUR OBAS

V.

CONSIDERING the progress
made in York, ALABAMA, as
the National Oba of our land,
we cannot but appeal to you upon
every matter that may prove of
great danger to our race, the tem-
perament of our people, the trans-
migration of YOKA ALABAMA, as
the Oba of the West. The foremost of
which is the

PRESERVATION OF THE RACE

This is a matter of vital
importance to the continuance of
our Oba on their thrones. For
there can be no Oba or thrones
without a people—a nation over
which an Oba is to rule.

It is therefore necessary that we
Oba should, above every thing else,
take deep interest in the increase
and preservation of the inhabitants
of the domain. It is for this pur-
pose that in the YOKA States,
national intercourses and services
are yearly offered to assist the
gathering spirit of details and
education in the form of Plagues,
Epidemics, Small-pox, Pox, Typhoid,
Typhus, Lightening, Thunder, War,
etc., etc.

But since the advent of western
civilization, we have been taught
and enlightened that most of these
malicious spirits, the messengers
of death and destruction, could be
prevented or avoided under certain
conditions. Yet, the most serious
and insidious of these destructive
spirits, Bacial Degeneration—an

offspring of ignorance, is being
highly successful in its deadly work
among the young generation, quickly
and easily, although the effects
could be publicly seen all around.

This process of degeneration
affects our young people physically
and mentally; the former is due to
early, uncontrolled marriages and
the latter, indulgence in alcoholic
drinks. Both of which could be pre-
vented if our National Obas would
combine to check these dangerous
practices.

These two evils are inter dependent
and the principal evil on which they
thrive is Bacial Degeneration, which
forbids husband or wife to have
other functions as well as drumming
and dancing, etc. always continued
in real of disease and should
be highly controlled by imposing
a time limit to the night life of
drumming and dancing; as a sup-
plementary makes the habit, the best
thing is for our Oba to agree to
the issuing of drumming license
for such occasions.

To stop the prevailing frightful
unions and prevent the breeding
of a future race of dwarves and
pigmies, the best thing is for our
Oba to rule that only persons of
a proper Age—(say 21 years)—may
marry. This could be easily carried
out by enforcing that Certificate of
registration of birth must be produced
in every case, while application should
be made difficult by imposing heavy
penalizations on the offenders. It is
admitted that in treating a dangerous
moldy, drastic measures may be
adopted when necessary.

For the preservation of the
population of this great country, we
respectfully submit the foregoing
to our Oba for their deep con-
sideration at the next Conference.

London Town Wells.

B. E. D. M.

The pathetic tragedy of W. Collins,
by the 21st September last, which
brought to an end the life of a 13
years old girl at the Ogden, popu-
larly known, hospital, at about 7 o'clock
evening, has moved me to write the
circulation of our Health Officers to
the danger of the numerous uncer-
tain wells in this town.

In London, the health-men that by the
Sanitary Inspectors on from house to
house every day to see how the in-
mates observe the Health Ordinance,
and if there is a well in a com-
pound, they order the owner to en-
close the inner part of it and build
a wall of about 3 to 4 feet in height
around the same, also to provide
suitable covering for the "pan". In
this way, they prevent (a) dirt from
getting into the well and (b) un-
necessary death of cats, dogs, birds, etc.,
in the well.

But in London town the surface of
a well is about 45—50 feet in cir-
cumference and the water is frequently
falling up to its brim; if it were on
level a table, with no well around it,
and no cover made for the surface,
dirt got into it as easy as an iron
plate gets into the air and the num-
ber of animals falling into these wells
at night is uncountable. I must en-
tail like Great, Shrop, Cilt, etc.

The worst thing is that men and
women are also victims of it and
through these wells. When a person
falls or stumbles into a well, he
or she sometimes may escape either
or being buried in the soil and may come
out a deaf boy. This is becoming
so frequent in the town. As there is
no one nor arrangements or sugges-
tion of closing of these wells, it is aw-
fully sad that the Bacial Officers should
please safeguard our lives by seeing
that these dangerous wells are im-
proved by having wells around them
at least three feet in height and that
a suitable cover be made for their
openings.

Many people generally around London
Market every month day and it is
quite unusual to find three Market days
to be a woman or two mothers to
a well.

I can ever to the point of St. Agnes,
Thomas I have never expressed the
fear of my men into a hole, but that
of which is unreasonable. It is also
necessary that the Health Officers
see to the covering of Salpans, I mean
a proper covering, that is, enclose on
planks and with conical arrangement.
The one of Mal on Bampton point is
dangerous; as soon as the hankon
door rolls, the mud top comes
down the weight of a man; so that
anyone who steps on the mud over
after the hankon is after once sep-
arately fall into the pit and thereby
risk his or her life in a sleep.

The wells and algae are for our
contaminated and to prevent our lives
but if they, Womers Well de Salpans
for our care, we should be encour-
ing our lives, special to our Health
Authority for an immediate improve-
ment is absolutely indispensable.

Press Notices.

The death of a European male from
pallid fever has been reported from
Kippen in the Oba of Perthshire. The
case is the disease that plagues the Oba
of Oba and death occurred on the 18th.
An Enteric fever Quarantine is being
maintained at the town of Kippen,
including a number of the town of Kippen,
the Oba of Oba and death occurred on the
18th of September, 1934.

It is hereby notified for general infor-
mation that 15s. Quarterly sessions
which were imposed at Dargun on the
16th of September, 1934, as the result of
a bill, one of public law, have been

printed with offices from the 101, of Church Street.

It is invited for personal information that the next meeting of the Legislative Council will be held on Monday the 10th of November, 1918, at 10 a.m. in the Council Chamber.
