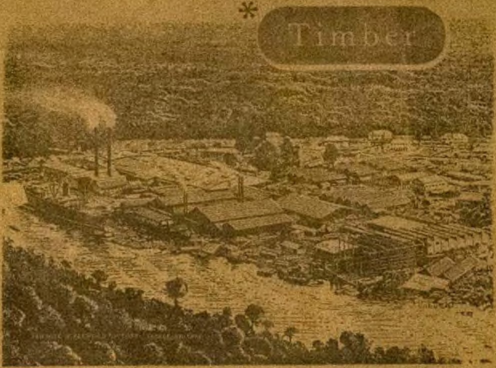
FACETS OF ENTERPRISE



"Veneer in the slipping machine"

Under Government licence and long-term forestry regeneration schemes, 130,000 tons of logs pass yearly through The United Africa Company's sawmill and plywood plant at Sapele, or are loaded there direct into the waiting ships. This enterprise creates employment for 8,000 persons, and yields some £240,000 annually in revenue to the Native Administration and Central Government. At Samreboi in the Gold Coast, centre of an 800 square mile concession, another sawmill is nearing completion. To serve it 140 miles of new roads and nearly a mile of bridges are being constructed.

So, through her timber, West Africa gains not only in exportable produce and material for her own building programme, but also in revenue and extensive opening-up of the country.
