The image shows a dark, textured surface, likely the cover or endpaper of an old book. A faint, light-colored cross pattern is visible, consisting of a large outer square and a smaller inner square, with diagonal lines connecting their vertices. The texture is grainy and uneven, suggesting a scanned photograph of a physical object.

Electricity Corpora- tion Of Nigeria SALE OF NON-FERROUS SCRAP

The Electricity Corporation of Nigeria proposes to invite tenders from established Scrap Merchants for non-ferrous scrap from the various Undertakings of the Corporation throughout Nigeria. The main bulk of the scrap is at Central Stores, Ijora.

The terms of the contract will require the Merchant to provide all facilities for the sorting, weighing and collection of scrap either at Lagos or nominated centres in the different Regions, and for the eventual shipment of the scrap to such destination as may be approved by the Corporation.

The tenders to be subsequently invited will be based on a return weight at current metal market rates and will be in respect of such non-ferrous scrap as is already available and as may become available up to 31st of March, 1959.

MERCHANTS desirous of being invited to tender should submit to the undersigned (in a sealed envelope marked "Confidential - Sale of Non-Ferrous Scrap") full details of their facilities not later than 7th Oct. 1958.

SALE OF FERROUS SCRAP

Tenders for ferrous scrap will also be invited from established Scrap Merchants on the same basis as for non-ferrous scrap, outlined above.

MERCHANTS desirous of being invited to tender for such ferrous scrap should submit applications to the undersigned (in a sealed envelope marked "Confidential - Sale of Ferrous Scrap") not later than 7th Oct. 1958.

MERCHANTS interested in both non-ferrous scrap and ferrous scrap required to submit a separate application in respect of each.
