卷之三

MENTHOLATUM

AMERICAN STEEL WORKERS were the first to succeed in unionizing their industry. They did it in 1937, and they did it in a determined way. In all other industries, the unions have been built up by the employers. The American Steel Workers Union was built up by the workers. It is the most militant union in America, and it is the most successful.

Aman Ajayi
Editor-in-Chief

Nothing can be done to stop the
progress of the disease, but the
disease can be stopped by the
use of a drug which has been
discovered by Dr. J. C. Gandy,
of the University of Michigan.
The drug is called "Gandy's
Remedy" and it has been
successfully used in many cases
of cancer.
