PROGRESSIVE BUSINESS GOES FORWARD BY RAIL

If you want to expand your market or industry, you can benefit from the dependable and low-cost services and facilities offered by the Nigerian Railway Corporation.

Freight trains on Nigerian Railway Corporation's 1,700-mile system (plus many miles of siding) travel north and south, east and west, all the year round, day and night, providing the vital link of the vast Nigerian Federation. Industries are linked to their markets, produce centres to the ports, little villages to big towns, all along the line.

You can count on the thorough co-operation of the Nigerian Railway Corporation at the ports, produce and industrial centres and at any of its 200 and more stations.

And what's more : you are dealing with people you can trust.

SEND YOUR GOODS NATION-WIDE BY RAIL

Radio Book Review:

How To Listen To The World News

By Olalekan Onatade

Radio and television sets are becoming increasingly well known in Nigeria. Nigerian housewives and students have taken great interest in local television programmes, and it is a very common scene to see the average worker carrying his transistor radio set to his working place every day.

BUT there is one missing link—that is dearth of radio books in local bookstalls, whereas people want books showing them how to tune their sets properly and how they can know all radio stations of the world and so on and so forth.

European publishers for the past few years have been busy compiling books on modern radio and television sets, one of these is an annual WORLD RADIO TELEVISION HANDBOOK published by WORLD PUBLICATIONS of Hellerup, Denmark (22/-).

A world-wide publication, the book is radio encyclopedia in itself though it is not at present available from the local bookstores the 18th (1964 edition) which I just received by post contains particulars about all broadcasting and television stations over the whole earth.

For instance, I opened the pages devoted to African radio stations and I saw one page marked Nigeria (Republic of). The information given about our local NBC is up-to-date.

Starting from Lagos (the capital) up to Ibadan, Enugu and Kano, I can tell you through the book what is the power of transmitters they are using in any of these stations and what time I can listen to their local news item.

Not these alone, WORLD RADIO TV HANDBOOK gives world times in all countries from Greenwich Mean Time (GMT) to American Standard time up to the time in Middle East.

Although I am a novice in wireless theories but through many years of practical experience I gathered that locating certain shortwave broadcasts are very difficult at times. If you study this book under review it will help you to understand some of the situations you may encounter from time to time when tuning your radio set for better reception.

In fact "WORLD RADIO TELEVISION HANDBOOK" guides you around the world with your radio another book of its kind (published by the same publishers) that I can recommend is THE NEW GUIDE: HOW TO LISTEN TO THE WORLD. They are books you have to look for and the whole radio world is right at your finger-tips if you have these books in your book shelf.

'Emery At Large'

OF "EMERY AT LARGE", the Star Dick Emery explains: "It's me playing different characters in various situations. You could call it EMERYWHERE".

Dick Emery's first radio series and is currently being broadcast in the BBC General Overseas Service.
